

## Technology Challenge

This half term we have been talking about different technology and how we use it at school or at home. We have been giving instructions to programmable toys (beebots) and completing simple games on the computer.

*Understanding the World: Technology*

*ELG: Children recognise that a range of technology is used in places such as homes and schools. They select and use technology for particular purposes. (40-60months- Completes a simple program on the computer, uses ICT hardware to interact with age appropriate computer software)*

### **Can your child go on a technology hunt?**

What different types of technology can you find in your home? Which technology can children use and what do the adults use?

Here are a few ideas:

- kettle
- microwave
- washing machine
- computer/ laptop
- tablet/ I pad
- phone
- CD player

**Please can you take some photographs** of your child using different technology around the home for them to share with their class when we return.

Thank you

Mrs Eason, Mrs Scott, Mrs D-Ioia & Mrs Dris
