

Flipped Maths Home Learning to be completed by Monday 16th January.

Equivalent fractions

<https://www.youtube.com/watch?v=mU5249bHGuc>

Your homework learning is to watch the video link and make notes about the learning to show your understanding. This will be being sent out to your parents via In touch today

The video is 11 minutes long and you are expected to spend 30 minutes on this task, which allows you to pause the video to make notes.

The idea behind this style of homework is that you can learn at your own pace, so should you wish or need to spend longer on this activity then you may do so.

Your aim is to return to class on Monday with a good understanding of how to convert fractions using both times tables and division skills.
